

EDUCATION

University of Central Florida
Bachelor of Science in Computer Science

Orlando, FL
May 2028

EXPERIENCE

Software Engineer Intern

Jun 2026 - Aug 2026

Amazon

Seattle, WA

- Designed, built, owned, and shipped **2+** projects for the **Prime Video Recommendations** team.
- Deployed a recommendation filtering microservice on **AWS Fargate**, processing **55K+** transactions per second.
- Developed recommendation-powered content cards for the **Amazon.com** homepage, delivering personalized experiences to **200M+** customers monthly and **90M+** customers daily.

Software Engineer Intern

Jan 2026 - Apr 2026

Cloudflare

Austin, TX

- Built, owned, and shipped **4+** high-impact **end-to-end** features for Cloudflare's **beta** product, **Containers**.
- Scaled and architected a **15x** increase in container resource limits, leading to an enterprise contract of **\$130M** and generating **\$100K+** in revenue from users deploying production **AI agent** workloads.
- Implemented regional and jurisdictional deployment constraints for **Containers** and **Workers**, reducing latency by up to **87%** by allowing deployment to **9** global regions, **2+** major cities, and **2+** compliance domains.
- Eliminated redundant updates in **Durable Objects** via state change detection, reducing writes by **57%**.

Software Engineer Intern

Nov 2025 - Jan 2026

Handshake

San Francisco, CA

- Optimized multimodal pipelines with **LangChain** and **Python**, improving downstream task accuracy by **19%**.
- Applied **diffusion models** for **synthetic data** generation, improving efficiency by scaling dataset size by **300%**.

Quantitative Software Engineer Intern

Jun 2025 - Aug 2025

Morgan Stanley

New York, NY

- Migrated a **C++** quantitative trading platform to the web, reducing latency by **50%**, and integrated **Grafana**.
- Developed **Python** pipelines for risk management, integrating market data and improving report quality by **45%**.
- Implemented an interpreter for **Intex Deal Modeling Language**, improving deal processing speeds by **200%**.

Software Engineer Intern

Sep 2024 - Dec 2024

Leidos

Orlando, FL

- Engineered multimodal pipelines with **Transformers**, improving visual-language performance in **LLMs** by **22%**.
- Fine-tuned **vision-language** and **machine learning** models for **pre-training**, increasing efficiency by **37%**.
- Constructed **data scraping** tools with **Python**, automating data collection and increasing productivity by **20%**.

PROJECTS

OpenTelemetry Collector | *Go, Prometheus, OpenTelemetry, Observability*

- Contributed **3+** open source pull requests to **OpenTelemetry**, enhancing reliability and correctness.
- Enabled re-aggregation for data receivers, ensuring **100%** aggregation completeness, and eliminating partial data.
- Improved data fidelity by preserving **11** log fields in the **Cloudflare** receiver that were dropped during ingestion.

Knight Hacks Monorepository | *Next.js, React, TypeScript, SQLite, Tailwind CSS, tRPC, Drizzle ORM*

- Architected a website for club registration with **React**, serving **2000+** students and **20+** company sponsors.
- Facilitated development of new tooling architecture, increasing **DX** by **80%**, and developer efficiency by **90%**.
- Implemented a multi-purpose chat bot with **25+** useful commands to serve a club chat of **5000+** members.

AgentNow | *Next.js, React, TypeScript, Google Cloud, Python, FastAPI, Eleven Labs, RAG, Machine Learning*

- Placed 2nd** out of **20+** competitors for **ServiceNow's AI Agent** challenge at Knight Hacks 2025.
- Deployed a **retrieval-augmented generation** API with **Google Cloud**, reducing LLM inference costs by **80%**.

TECHNICAL SKILLS

Languages: Python, TypeScript, Go, Java, C++, C, JavaScript, SQL, R, C#, GLSL, HTML, CSS

Frameworks: React, Angular, FastAPI, Spring Boot, Next.js, Node.js, Express.js, Tailwind CSS, tRPC

Libraries: scikit-learn, PyTorch, TensorFlow, NumPy, Pandas, Flask, Django, OpenCV

Tools: Git, Docker, Kubernetes, Grafana, Prometheus, OpenTelemetry, ClickHouse, Kibana, Elasticsearch, Jaeger, Cloudflare, Vercel, Amazon Web Services, Microsoft Azure, Google Cloud Platform, Redis, MongoDB, Jupyter Notebook, Linux, PostgreSQL, SQLite, Selenium, Playwright, Vitest, Prisma, Unity
